

Let's play
Adventure

Nature's inspiration - children's Adventure

Playing out in the nature is probably the best way to stimulate children's physical, creative and social development - and an excellent alternative to quiet sitting games. That is why we let nature inspire ourselves to develop this brandnew play structure called "Adventure" with its natural design and novel activities, made to challenge children of all ages - and make them use their imagination to create themselves an adventure!

High play value

Different height towers with unconventional play houses, hanging huts, innovative climbing nets and all the other activities offer plenty of possibilities for motor and social challenges, while the funky design prompts the children to make use of their imagination.

Modularity for optimal utilization of space

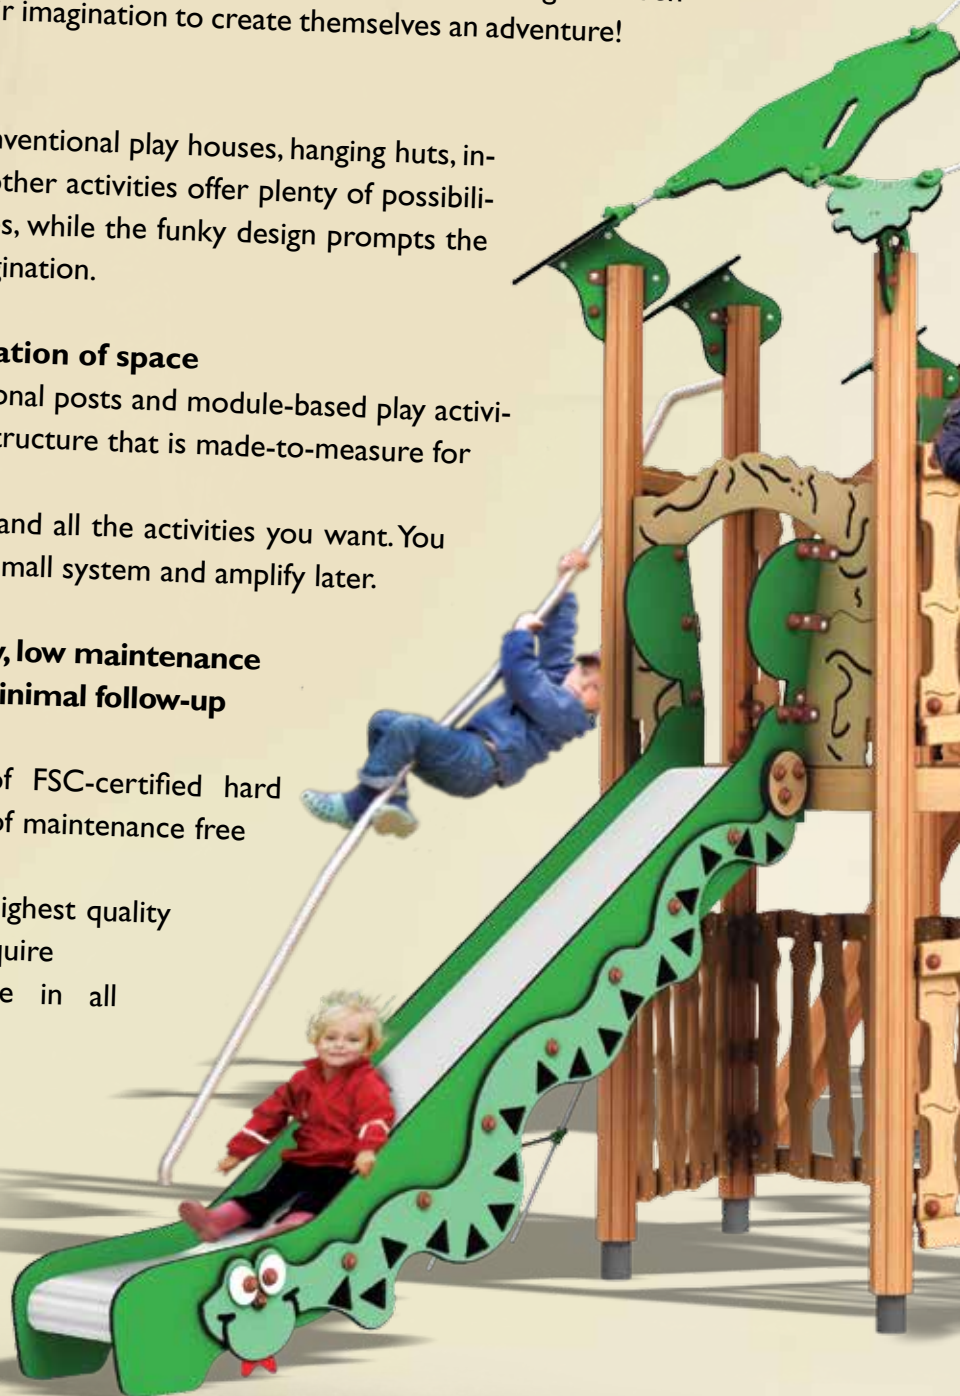

Triangular floor elements, hexagonal posts and module-based play activities allow you to design a play structure that is made-to-measure for your playground.

You can choose a basic model and all the activities you want. You can also start by choosing a small system and amplify later.

Eco-friendly, high-quality, low maintenance materials guarantee minimal follow-up costs.

Adventure is made of FSC-certified hard and cedar wood and of maintenance free polyethylene.

All materials are of highest quality and longevity and require minimal maintenance in all kinds of weather.

ration venture...

Did you know ...

- That Ledon gives 10 years guarantee on material faults and manufacturing errors and 5 years guarantee against considerable fading of all PE-parts?
- That all stepping and sitting surfaces are coated with 3 mm rubber to make them skid-proof?
- That all edges are rounded and all nuts capped by nut covers?

Playing activities

- for bigger children...

Playhouse

Unconventional design playhouse. Can be placed high above or on the ground. Made with skew angles, peepholes and open gables, it can function as a cave and provides high play value for several children at a time.

Jungle hut

Children simply love caves! And this one even moves. The hanging hut is an extra thrill and will ignite imagination, role play and adventure - or just be a refuge.

Look-out

Climb up and you will overlook it all from your own look-out! New fun activity. Several of them will allow innovative group play.

Monkey bar

with hanging handles

Monkey/ giraffe climbing net

Climb up and turn the monkey's / giraffe's mouth or eyes until it looks happy or sad. A new way to make the classic climbing net more fun.

Climbing wall

Unconventional climbing wall with several options

Ladder

Of tough mandio- quira wood.

Lianes

Add a top beam with 3 lianes or single lianes on the horizontal climbing net.

Open slide

Made of polyethylene - doesn't heat up in the sun.

Tube slide

Made of polyethylene that doesn't heat up in the sun. Tubes with win- dows available.

Handles

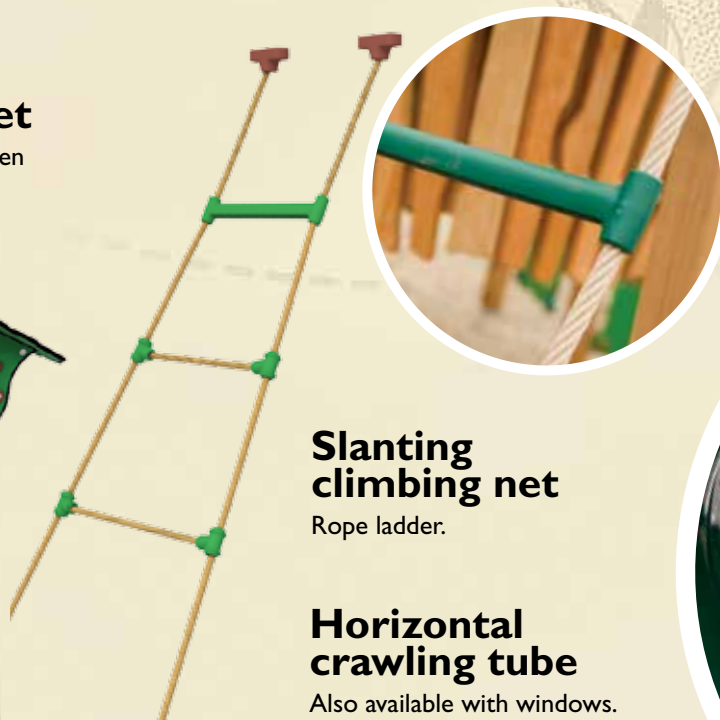

For horizontal monkey bar or vertical climbing net.

Horizontal climbing net

Get the feeling of hovering between the trees!

Vertical climbing net

Climbing net to be mounted between two poles.

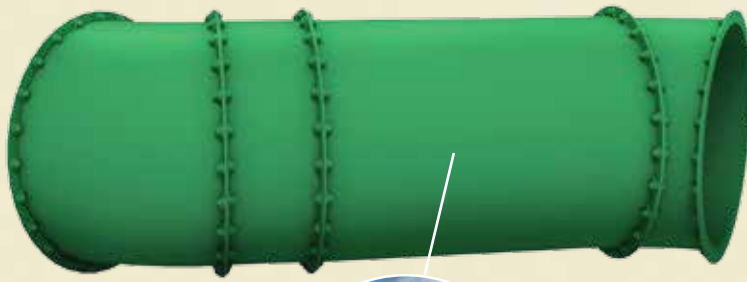

Slanting climbing net

Rope ladder.

Horizontal crawling tube

Also available with windows. Exiting new games with a view!

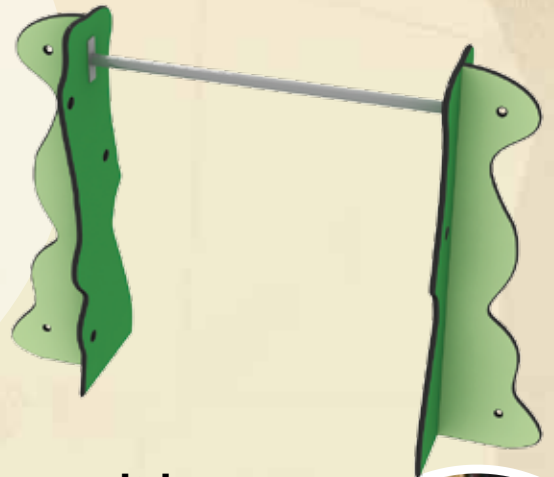

Playing activities

- for younger children...

“Telescope”

Look for your friends! It can turn up and down and to the side.

Somersault bar

It strengtens the physique and the sense of balance.

Platform

The classical place for freedom and overview.

Gangway

Easy access to the platform. Materials in maintenance free polyethylene.

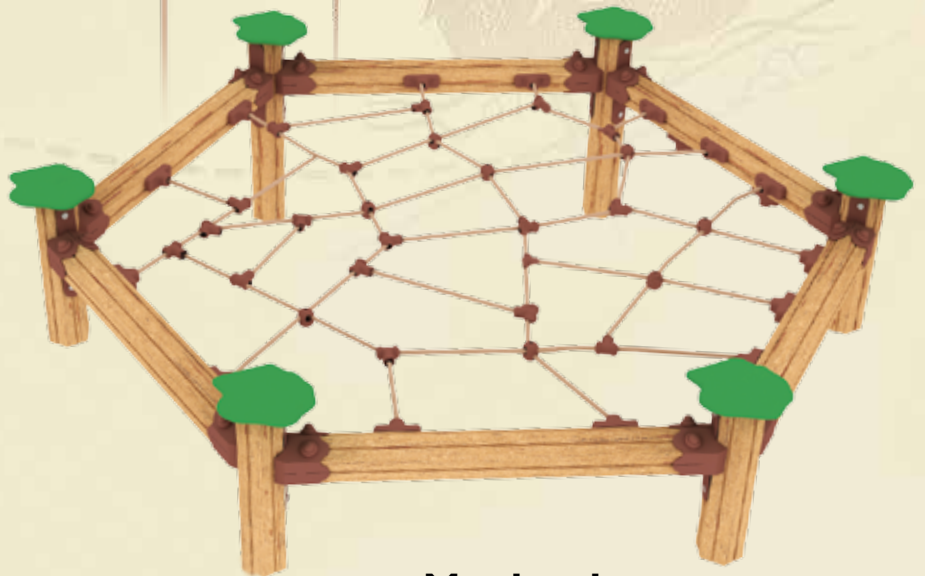

Jungle hut

Children simply love caves!
And this one even moves!
The hanging hut is an extra
thrill and will ignite
imagination, role play and
adventure - or just be a
refuge.

Horizontal climbing net

You can climb on it and under it!

Monkey bar

with hanging handles.

Look-out

Climb up and you will
overlook it all from your
own look-out! New fun
activity. Several of them will
allow innovative group play.

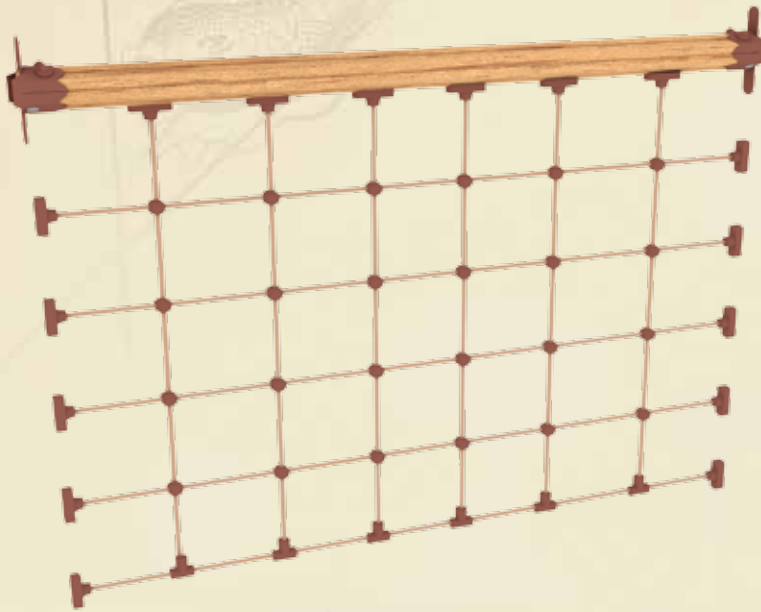

Wall with a step

Easy access for small children.

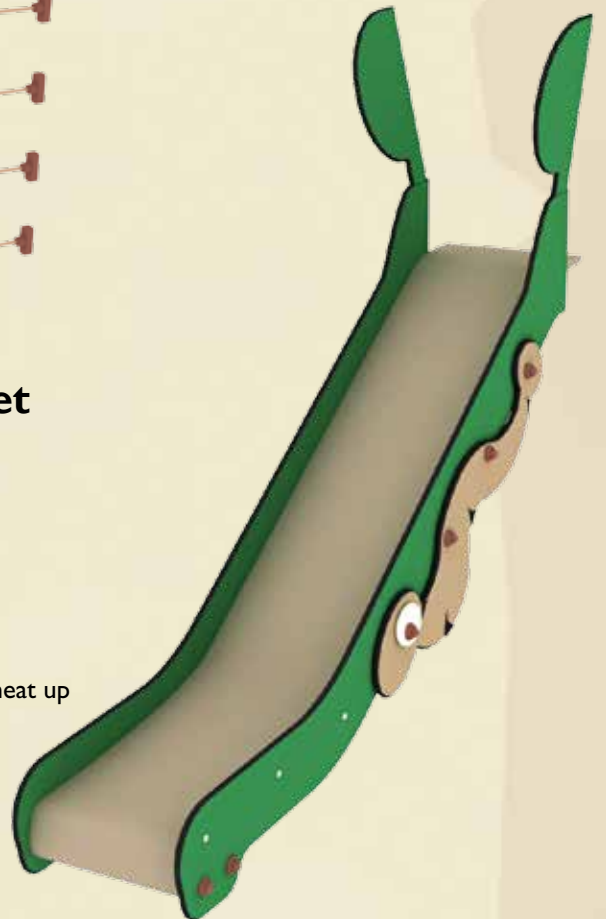

Tube slide

Made of polyethylene that doesn't heat up in the sun.

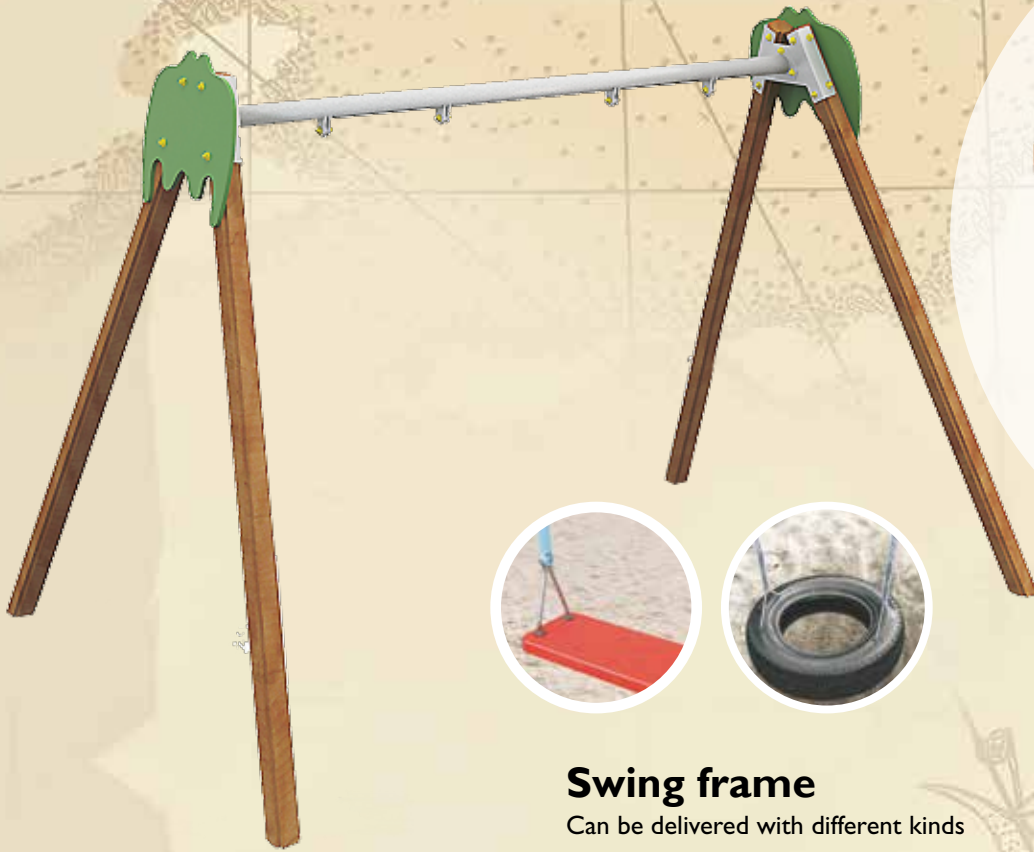

Vertical climbing net

Climbing net to be mounted between two poles.

Open slide

Made of polyethylene that doesn't heat up in the sun.

Swing frame

Can be delivered with different kinds of swing seats.

Sandbox

You can amplify the sandbox by modules of 108 cm later.

Sandbox table

Item: 633210

With great play value.

Panel with 2 benches and 1 table

Item: 630170

Materials in maintenance free polyethylene and hardwood.

Kitchen

Item: 630173

Turn the buttons and cook or bake a cake!

Sandmill

Item: 630175

Materials in maintenance free polyethylene and hardwood.

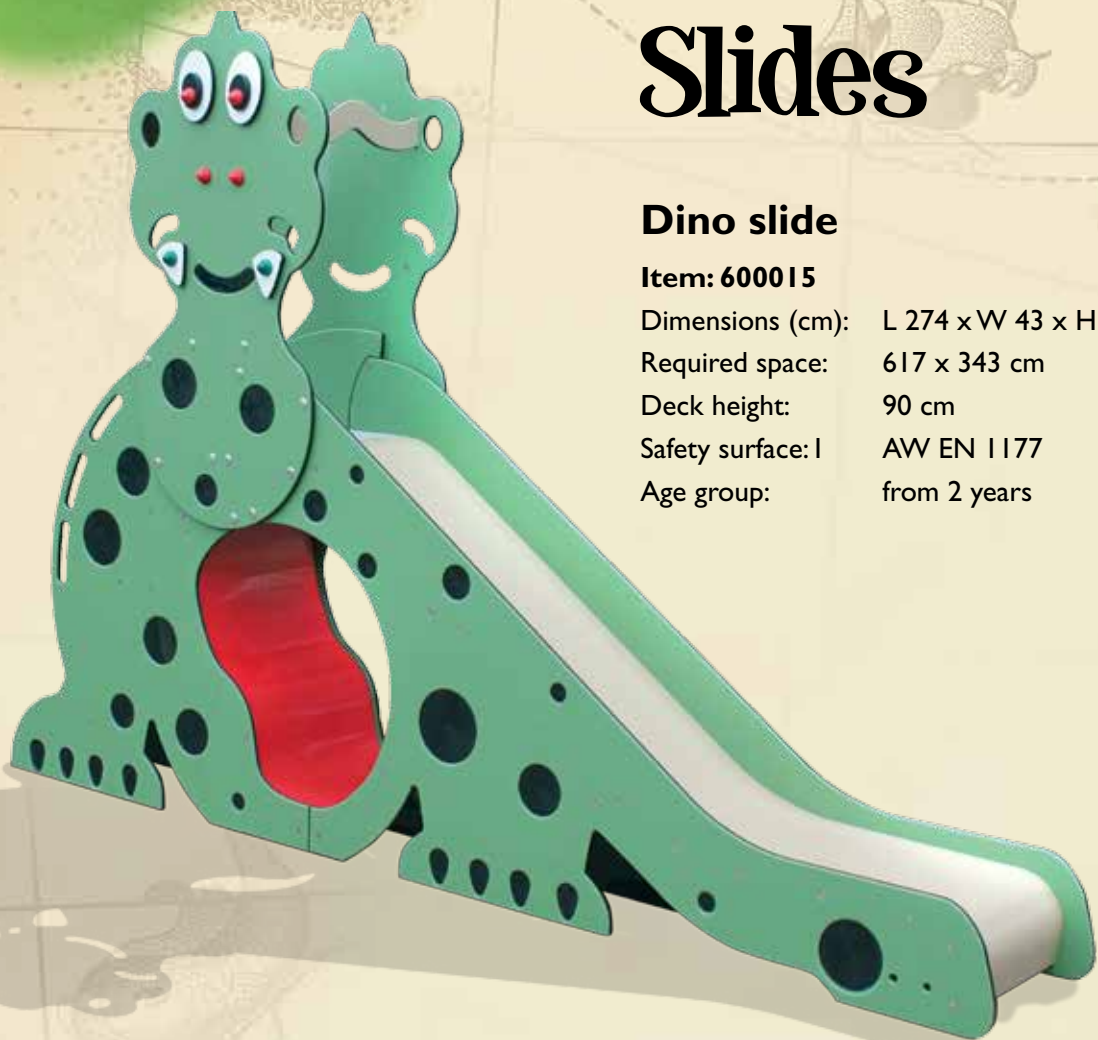

Gold digger wash

Item: 630174

Like being in the wild west!

Slides

Dino slide

Item: 600015

Dimensions (cm): L 274 x W 43 x H 188

Required space: 617 x 343 cm

Deck height: 90 cm

Safety surface: I AW EN 1177

Age group: from 2 years

Brown bear slide

Item: 600025

Dimensions (cm): L 178 x W 43 x H 72

Required space: 528 x 343 cm

Falling height: 58 cm

Age group: 1-3 years

Polar bear slide

Item: 600020

Dimensions (cm): L 178 x W 43 x H 72

Required space: 528 x 343 cm

Falling height: 58 cm

Age group: 1-3 years

Natural colours and materials join together in an exiting, unconventional design that fits into almost any surroundings.

Nature's inspiration - children's adventure...

laying out in the nature is probably the best way to stimulate children's physical, creative and social development - and an excellent alternative to quiet sitting games.

That is why we let nature inspire ourselves to develop this brandnew play structure called "Adventure" with its natural design and novel activities, made to challenge children of all ages - and make them use their imagination to create themselves an adventure!

Design your own structure to fit your playground

Triangular floor elements, hexagonal posts and module-based activities allow you to design a play structure that is made-to-measure for your playground.

Build your playground in stages

You can choose a basic model and then all the activities you want. You can also start by choosing a small system and amplify later.

Exampel for optimal fitment of an Adventure play structure on an existing playground, thanks to its modularity.

Required space: 750 x 650 cm

Climbing height: 248 cm

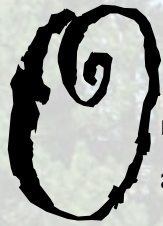

Deck height: 140 cm

Safety surface: IAW EN 1177

Age group: from 5 years

Development

One of the best things about being a child is that you learn as you play – without even knowing it.

For more than 40 years, Ledon has played a leading role in regards to the design of playground items that give children top play value. Playing with Ledon playground items means developing motor and social skills - and the children's general ability to learn.

When Leo Donbæk back in 1969 sat down on a playground and observed the children play, he quickly discovered how they queued for everybody's favourite: the slide. That day, Ledon's mission was born: To create playground items that make children play, not queue. Items that challenge the children's motor, language and social skills - all in a safe environment.

These last years, focus on children's development has increased even more. We only develop products that we know will strengthen the children's future competences. We have come up with several groundbreaking, totally novel products, such as the dexterity game.

Eco-friendly quality and safe solutions

FSC

We only use FSC-certified mandioqueira and cedar wood.
(FSC-C105188)

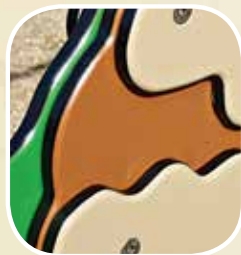

PAH free

All synthetic materials are checked for PAH by TÜV.

Safety

The Adventure play structure is controlled and approved by TÜV in accordance with the latest release of EN 1176.

No cracks, no junctions

Our polyethylene boards do not split, and there are no gaps in the junctions. Neither fingers nor parts of clothing can get stuck or rip.

No sharp edges

All edges are rounded and all nuts capped by nut covers.

Maintenance-free materials

Posts and top beams

All posts are made of Canadian cedar wood (FSC) with a high natural content of oils. 10 years guarantee against dry rot and mould. Maintenance free. You can give it some high quality wood oil if you wish to keep the original colouring.

Floors, side panels etc.

All floors and side panels are made of Brazilian mandioquiera wood, which is extremely hard-wearing. High natural content of oils. 10 years guarantee against dry rot and mould. Maintenance free. You can give it some high quality wood oil if you wish to keep the original colouring.

Polyethylene

All PoLedon-boards and tube elements are made of eco-friendly polyethylene (PE). Advantages: no maintenance - non-toxic - 100% recyclable - cracks and scratches do not affect the material's stability or longevity. All PoLedon-boards are UV-stabilized. 5 years guarantee against considerable fading. 10 years guarantee on material faults and manufacturing errors.

Break-proof ropes

All ropes are supplied with vandalism-safe steel inserts and can take a peak load of 4500 kg.

Synthetic parts

All joints and rope holders, all nut covers, foot rests, etc. are made of impact-proof nylon that can take temperatures from -40°C til +110°C.

10 years guarantee
on material faults and
manufacturing errors.

5 years guarantee
against considerable fading
of synthetic parts.
